

MUHAMMAD SYAMIL HAIKAL BIN MOHD SAMAN

muhammadysmailhaikal@gmail.com

PROFESSIONAL SUMMARY

Diploma in Computer Science student (CGPA 2.40) at UTM Kuala Lumpur with strong skills in programming, web and mobile application development, and multimedia design. Experienced in leading academic projects and applying problem-solving, creativity, and teamwork to deliver practical solutions. Passionate about data communication, networking, and continuous learning, with proven adaptability and leadership in both academic and extracurricular activities.

PROFILE

Gender : Male
Birthday : 12 January 2006
Birthplace : Kuala Lumpur
Religion : Islam
Race : Malay
Nationality : Malaysian

CONTACT

Phone
+6013-367 0031

Email
muhammasyamilhaikal@gmail.com

ADDRESS

No.18, Jalan Tanjung Karang 30/245,
Seksyen 30 Shah Alam, Selangor

COMPUTING SKILLS

Microsoft Office
Word, Excel, Power Point

Google Workspace
Docs, Sheet, Slides, Forms, Drive

Adobe
Illustrator, Photoshop, Character Animator,
Media Encoder, Video Editor

Design & Multimedia Tools
Canva, Scratch 3, Abro soft FantaMorph

EDUCATION

UNIVERSITI TEKNOLOGI MALAYSIA, KUALA LUMPUR

July 2024 - Present
Diploma in Computer Science
CGPA - 2.40 (as of Semester 4, Semester 5 in progress)
*** Expected Graduation: November 2026*

SAMT SULTAN HISAMUDDIN

January 2019 - March 2024
Sijil Pendidikan Malaysia (SPM)
1A, 1B+, 3B, 3C+, 1D

SJK(C) HAN MING

January 2013 - December 2017
Ujian Pencapaian Sekolah Rendah (UPSR)
2A, 2B, 1C, 1D, 2E

DIPLOMA PROJECT

TEXT-TO-SPEECH INTERGRATION | ANDROID APPLICATION (ANDROID)

January 2026 – January 2026

Implemented Android Text-to-Speech functionality to convert dynamic text input into spoken output for accessibility and user convenience. Configured TTS engine initialization, language selection, and lifecycle handling to ensure stable and reliable voice output. Integrated a user-controlled setting to enable or disable voice alerts according to user preference. Tested the system under various scenarios to ensure accurate speech conversion and smooth playback. Applied knowledge of Android APIs and event-driven programming. Learned to manage asynchronous processes and audio playback effectively. This project demonstrates hands-on experience with accessibility-focused development. Highlights the ability to enhance user experience through advanced mobile system features.

ANDROID UI INTERACTION | ANDROID APPLICATION (ANDROID, JAVA, KOTLIN)

October 2025 – November 2025

Developed and tested Android user interface components to manage application state during media playback and user interactions. Focused on handling button clicks, switch toggles, and preventing conflicting actions during siren activation. Implemented event listeners and conditional logic to ensure responsive and reliable UI behavior. Learned to track and control application states dynamically, responding to multiple user inputs simultaneously. Applied debugging techniques to identify and resolve interaction issues. This project emphasizes practical problem-solving skills in mobile UI development. Demonstrates a clear understanding of activity lifestyle management and state-driven design. Highlights the ability to build user-friendly, interactive Android applications.

DATA HANDLING PROJECT | WEBSITE (MYSQL, HTML, CSS)

October 2025 – October 2025

Video & Audio Editing

CapCut, Movie Maker, Audacity, VN, In Shot

Programming Editor

Notepad++, Dev-C++, NetBeans IDE, Microsoft Visual Studio, Android Studio, Arduino IDE, Jupyter Notebook, Visual Studio Code, Brackets.io, Textpad, Google Colab

Network & Circuit Simulator

Deeds

Video Conferencing

Google Meet, Microsoft Teams, Webex, Zoom

Virtualization & OS Platforms

Windows, Linux, Android, Virtual Box

Modelling & Diagramming Tools

Draw.io, StarUML, Raptor, Lucid Chart

Content Management Program

Wix, WordPress, Thunkable

Database Tools

MySQL(phpMyAdmin), Google Firebase

Project Management System

Trello, GitHub, GitHub Desktop

Local Server Tools

Xampp, Uniserver, Wamp

TECHNICAL KNOWLEDGE

Security Fundamentals

Computer Hardware

Database

Internet of Things

Video & Audio Editing

Mobile Application

Web Application

Programming Language

HTML, C, C++, Java, JavaScript, PHP, CSS, VB. Net, Python, Assembly, SQL

Framework

Bootstrap, Laravel, Angular

LANGUAGE

Common European Framework of Reference for Languages (CEFR)

Level: Grade B1

Malay Language

Read : ●●●●●●●●●●

Spoken: ●●●●●●●●●●

Written: ●●●●●●●●●●

English Language

Read: ●●●●●●●●○○

Spoken: ●●●●●●●●○○

Written: ●●●●●●●●○○

Built and tested multiple web forms using HTML and PHP to capture and process user input in a structured manner. Implemented POST-based data transfer and basic input validation to ensure secure and accurate data submission. Connected form inputs to a MySQL backend for persistent storage and retrieval of information. Developed a user-friendly interface to facilitate smooth data entry and display. Applied best practices in web form design, data handling, and server-side processing. Learned to debug form submission errors and prevent common security vulnerabilities. This project demonstrates foundational full-stack web development skills. Highlights the ability to integrate frontend and backend systems effectively in practical applications.

WINDOWS FORM | FORM
(MICROSOFT VISUAL STUDIO, C# LANGUAGE)
September 2025 – October 2025

Windows Forms is a framework used to build desktop applications with graphical user interfaces using C#. In Lab Skill #01, you worked with UI components such as textboxes for input, radio buttons and checkboxes for selections, picture boxes for displaying images, and buttons for user actions. The application responds to user actions through event-driven programming, such as Button Click events. Input validation ensures users enter correct and complete data before processing. Conditional logic (if/else) is used to control program flow based on user choices. You also learned how the UI elements are connected to backend code. Overall, WinForms helps you understand how desktop applications interact with users effectively.

LEAVE APPLICATION SYSTEM | DATABASE
(XAMPP, MYSQL, HTML, CSS)
May 2025 - June 2025

The Leave Application System is a web-based system designed to replace manual, paper-based leave requests with an automated digital process. It allows users (employees) to log in using their ID and name, submit leave requests, and view their leave status online. The system automatically checks the user's remaining leave balance before allowing a request to be submitted, reducing human error. Approvers (such as managers or admins) can review each request and either approve or reject it through the system. Once a decision is made, the leave status is updated in real time. If approved, the system automatically deducts the leave from the user's leave balance. This system improves efficiency, accuracy, and record management while saving time for both users and administrators.

FLORIST MANAGEMENT SYSTEM | WEBSITE
(CSS, HTML, PHP, MYSQL)
February 2025 - April 2025

Developed a web-based customer registration and management system using PHP and MySQL for a small business environment. Designed and implemented a relational database to store customer details such as name, contact number, and address. Built full CRUD functionality, enabling users to create, retrieve, update, and delete customer records through a web interface. Implemented server-side logic using the MySQL extension and wrote SQL queries including INSERT, SELECT, UPDATE, and DELETE. Handled form submissions securely using the POST method and validated user input. Created a simple and user-friendly interface using HTML and CSS. Applied the complete web application workflow from frontend to back-end and database integration. This project demonstrates strong back-end development and database management skills.

C++ APPLICATION CONSOLE | CONSOLE APPLICATION
(C++)
August 2024 – October 2024

In this project, I created a menu-driven console application using C++ that focused on core programming fundamentals. The application utilized loops, conditional statements, and functions to control program flow and respond to user input. Users could navigate through different options using a text-based menu, making the program interactive and structured. This project helped improve my logical thinking and problem-solving skills, as well as my understanding of input or output handling and modular programming in C++.

INTEREST AND HOBBY

Actively expanding knowledge through reading to sharpen analytical thinking, engaging in rugby to build teamwork, leadership, and strategic problem-solving skills, and creating eye-catching digital designs on Canva to strengthen creativity, visual communication, and attention to detail. These activities reflect a proactive mindset, a collaborative spirit, and a strong drive for continuous learning and personal growth.

AWARDS

- February 2025

: 1st Place – Dogeball COMSPORT
Universiti Teknologi Malaysia, Kuala Lumpur
- October 2025

: 1st Place – Volley Ball COMSPORT
Universiti Teknologi Malaysia, Kuala Lumpur
- July 2024

: 1st Place - Orientation (Mobile Legends)
Universiti Teknologi Malaysia, Kuala Lumpur
- High School

: 3rd Place – K-Semanis 2023
UITM Puncak Alam

LEADERSHIP ACTIVITIES

- Oct 2024

: President Gerakan Pengguna Siswa
Universiti Teknologi Malaysia, Kuala Lumpur
- 2022 - 2023

: Resource Center Supervisor
SAMT Sultan Hisamuddin

EXTRACURRICULAR ACTIVITIES

- Dec 2025

: Participant – Wacana Intelektual Madani (MINDS)
Kolej Siswa Jaya, Semarak, Kuala Lumpur
- Mar 2025

: Volunteers – Sahur League
Kolej Siswa Jaya, Semarak, Kuala Lumpur
- Mar 2025

: Participant – CAHAYA RAMADHAN
Universiti Teknologi Malaysia, Kuala Lumpur
- Oct 2024

: Participant – Skymaster Drone Workshop
Kelana Siswa, Universiti Teknologi Malaysia, Kuala Lumpur
- Nov 2024

: Participant – Leadership Courses 2024,
Universiti Teknologi Malaysia, Kuala Lumpur
- Apr 2023

: Participant – K-Semanis
UITM Puncak Alam
